Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments have been fully considered but they are not persuasive.

In the remarks the applicant argues in substance that; A) The instant specification provide support for claim limitation "showing a responding procedure of how to respond to a test mail according to a destination, to a user" on page 15, lines 18-19 and shown in Figs. 1,3,4 and 5.

In response to A) The examiner respectfully disagree with the applicant. The examiner carefully reviewed cited figures and portion of the specification found no support for this claim limitation. The cited portion of the specification merely recites "sends test mail for checking the validity of the mail address of the forward destination". There is no teaching for showing responding procedure or steps how to respond. Kubik teaches how to validate a destination address of a test mail (see Column 5, lines 32-46). Therefore, Kubik's teaching of validating destination address meets the claim limitation.

B) Kubik does not teach "accepting a setting request of a forward destination address corresponding to a receipt address of an E-mail addressed to the receipt address and the E-mail being to be forwarded to the forward destination address".

In response to B) The applicant is reminded that claim limitation must be given their reasonable broadest interpretation. Kubik teaches validating or testing a destination or recipient address prior to sending a message. In order to test the address, existing header is extended to include a test header. The test header allows a sender to test an e-mail address without sending the message (see Column 5, lines 21-46). Therefore, Kubik's teaching updating header by including test header to test address without sending message meets the claim limitation..
